<b>Zolltarifnummer:</b>	84733020
<b>Gewicht:</b>	0 kg

HiFiBerry Digi+ Pro is a high-quality S/PDIF output for the Raspberry Pi. It uses the I2S sound port that connects directly to the CPU without the need for an additional USB conversion.

You will need a distribution with an up-to-date kernel (at least summer 2016). The drivers are included in the latest versions of most common distributions.

- The digital interface for the audio enthusiast. Features a low-noise power regulator and dual-domain clock generator.
- Output Connectors: TosLink and RCA, optional BNC
- Chipset: Cirrus
- Clock generation: Dual low-jitter oscillators
- HAT compliant: Yes
- Access to GPIO: Yes
- Galvanic Isolation: Yes
