

## DS3231 Real Time Clock Modul für Raspberry Pi

Artikel-Nr.:	RPI-RTC
Hersteller:	Sertronics
EAN:	4251266700746
Herkunftsland:	China
Zolltarifnummer:	84733020
Gewicht:	0.003 kg

Real Time Clock / Echtzeituhr Modul für Raspberry Pi mit sehr hoher Genauigkeit.

### Technical Data:

- Raspberry Pi DS3231 high precision clock module.
- To provide continuous timing battery backup.
- Low power consumption.
- The device compatible with DS3231 encapsulation and function.
- Complete the clock calendar function including the second, minute, time, week, date, month, and year, and provide the valid until 2100 leap year.
- Two calendar clock.
- 1 Hz and 32.768 kHz output.
- Reset the output and input button to tremble.
- High speed (400 KHZ) the I2C serial bus.
- + 2.3 V to + 5.5 V power supply voltage.
- The accuracy of plus or minus 3 degree.
- digital temperature sensor.
- Net weight: 2 g / 0.07 oz.
- Size: 15 x 13 x 14 mm / 0.59 x 0.51 x 0.55 inch.
