

seeed Grove - Sauerstoff / Oxygen Sensor (MIX8410)

N.º artículo: SE-101990680

Hersteller: seeed

Herkunftsland: China

Grove - Oxygen Sensor (MIX8410) is an electrochemical oxygen sensor and it can be used to test the oxygen concentration in air. Under the catalysis of the electrodes, a redox reaction occurs on the working electrode and the counter electrode, thereby generating a current. The concentration of oxygen in the air is calculated by measuring this current and referring to the oxygen concentration linear characteristic graph.

Lieferumfang:

- Modul
- Grove Anschlusskabel
